10-Nov-2008

PURE International, the specialist real estate sales and marketing agency, is highlighting investment opportunities in Mauritius to discerning Dubai property buyers. PURE International's team is informing investors of new measures introduced by the Mauritian Government, which make this tropical island destination even more appealing to potential property purchasers.

Phil Agius, MD, Pure International, said, "The Mauritian Government has recently allowed property purchasers to buy freehold on these idyllic islands for the first time, with the added benefit of Mauritian permanent residency for the buyer and their immediate family. This decision has been incredibly well received, boosting interest in the local resort real estate market, and serving to strengthen the appeal of what is already acknowledged as one of the most desirable global getaway destinations."

PURE International is offering Dubai's property buyers the opportunity to purchase villas on the luxury residential lifestyle estate, Villas Valriche. Comprising 288 freehold title villas set on a hillside in over 200 hectares of flourishing grounds, the real estate development offers spectacular views of the Indian Ocean alongside golf courses. Former sugar cane plantation is situated in the Domaine de Bel Ombre area on the south west coast of Mauritius, close to the Le Morne Peninsula and is only a 45-minute drive from the airport.
